

PRODUCT:

3030 SURFACE MOUNT LED

FEATURES:

3.0 mm × 3.0 mm × 0.52 mm surface-mount LED 120° emission angle

DESCRIPTION

YUJILEDS® Spectrum^x series LED provides the flexibility on tuning dynamic spectrum for achieving high CRI or required spectra for any specific application. This mid-power LED can be used in a variety of applications demanding high color quality and performance.

INSTRUCTIONS FOR SMT

Problems caused by improper selection of collet

Choosing the right collet is important in ensuring product quality after SMT. LEDs are different from other electronic components, as they are not only concerned with electrical output but also optical output. This characteristic makes LEDs more fragile in the process of SMT. If the collet's lowering height is not well set, it will bring damage to the gold wire at the time of collet's pick-and-place process which can cause the LED to not illuminate, flicker or contribute to other quality problems, some of which may not be immediately detectable.

Collet selection

During SMT, please choose the collet that has larger outer diameter than the lighting area of lens, in order to avoid damage the gold wire inside the LED. Different collets fit for different products, please refer to the following figures below.

NOT OK – COLLET TOO SMALL

Setting the height of the collet is crucial in order to avoid damage to the top view SMD. If the collet setting is set to too low of an altitude, the collet will press down on the SMD, causing damage or breakage to the encapsulant and cause distortion or breakage of the gold wire.

Other notes of caution:

- No pressure should be exerted to the epoxy shell of the SMD under high temperature.
- Do not scratch or wipe the lens since the lens and gold wire inside are rather fragile and cross out easy to break.
- LED should be used as soon as possible when being taken out of the original package, and should be stored in anti-moisture and anti-ESD package.
- This usage and handling instructions are for reference only.

LOT NUMBERING SCHEME

Yuji LED uses two formats for lot numbering purposes:

1) YYYY-MM-XXX-Z

YYYY: 4-digit manufacturing year MM: 2-digit manufacturing month XXX: 3-digit inventory number (000 – 999) Z: internal alphanumeric code

2) YYYYMMXXX

YYYY: 4-digit manufacturing year MM: 2-digit manufacturing month XXX: 3-digit inventory number (000 – 999)

SHIPPING INFORMATION

NOTES:

- 1. Reeled products (max 5,000 pcs / reel) are packed in a moisture-proof bag along with a moisture desiccant pack.
- 2. Each inner box contains up to 5 moisture-proof bag (total maximum number of SMDs is 25,000pcs). Box package size: 246 mm x 225 mm x 76 mm.
- 3. Each outer package contains 10 inner boxes. Box size: 490 mm x 400 mm x 262 mm.
- 4. Outer package is sealed with protective bubble wrap and foam. (Part numbers, lot numbers, quantity should appear on the label on the moisture-proof bag, part numbers).
- 5. This packaging merely intended as a reference for standard quantity orders only please note that actual packaging can differ depending on the order circumstances.
